

Chatter Board Pro AV46652 A3 Pro LT47761

This new version of this popular resource uses rechargeable batteries making it a more environmentally friendly choice for your classroom.

It also has two headphone sockets which will help to reduce noise levels and encourage pupils to concentrate and hear the recorded words clearer.

Here are some of the comments from the STAEDTLER Teachers' Club.

Perfect for non-verbal children to be able to communicate their ideas or express their likes and dislikes.

Ideal in my speech and language support role.

Use with Makaton signs and symbols.

Amazing for children to learn new vocabulary and think through their sentence structure.

Great for developing oracy.

A good tool for MFL as a prompt for speaking and writing.

Support sentence building.
Use the chatter Board to describe things and improve sentences.

With 44 blank dry-wipe tiles each with a 10 second record time, this versatile resource is perfect for many activities.

Easy to create your own boards by changing the symbols on each tile or by creating your own grids using the grid generator <https://micetf.fr/tableau-bavard/> [micetf.fr]

Fabulous in reception classes for sounding words out in phonics and helping with sentence writing.

Great for phonics and literacy in general.

Use them to record words, repeat back, create a story map, and listen and write words.

Have fun storytelling, text mapping, and guessing messages.

Ideal to help children to organise and record their ideas.

Great way to get children to retell and create their own stories. Encourage creative writing.

Really beneficial to support SEND children and EYFS.

A good way to encourage conversations for SEND children. Perfect for non-verbal students- help with communication with them.

Ideal for children who struggle to write a sentence, a good way to promote independence.

Encourages communication across the curriculum.

Use for 1 to 1 talk to a partner or group 'task board' sessions.

Perfect for small groups to do speech and language exercises. Use for interventions in phonics, speech and language.

Great way to learn tricky science vocabulary. Perfect for lower ability KS3/4 groups.

Use in Music to help pupils focus and learn repeated parts of songs, rhythms and melody.

Use to help with home schooling.

A good memorisation aid.

Many thanks to the STAEDTLER Teachers' Club for sharing these reviews with us.
