

TTS Illuminated Glow Roller Shakers (EY11967)

In this case study, Ellie Fox, Nursery Manager from Think For The Future Tots Nursery, discusses the different ways in which the Glow Roller Shakers were used with the children in nursery and the learning that took place.

Background Information

TFTF Tots is a nursery that values the incorporation of technology and sensory experiences into their curriculum. The nursery decided to introduce the Illuminated Glow Roller Shakers to enhance the children's understanding of technology and provide calming sensory opportunities. This case study explores the implementation of the product and its impact on the children's learning outcomes.

Implementation:

The nursery staff at TFTF Tots implemented a free play approach, allowing the children to explore and engage with the Illuminated Glow Roller Shakers at their own pace. They provided a variety of activities to encourage the children's interaction with the resource.

During free play sessions, the children were given the opportunity to hold and explore the Glow Roller Shakers, listening to the different sounds and observing the changing colours. The staff also incorporated the shakers into music sessions, encouraging the children to shake them along with the rhythm. Additionally, the Glow Roller Shakers were used in sensory relaxation activities, creating a calm and soothing environment for the children.

Impact:

The implementation of the Illuminated Glow Roller Shakers had several positive impacts on the children's learning outcomes at TFTF Tots.

- **Understanding Technology:** Through their exploration and play with the Glow Roller Shakers, the children developed a better understanding of technology. They observed

how the shakers emitted light and experienced cause and effect as they shook the shakers to activate the lights.

- **Calm and Relaxing Time:** The use of the Glow Roller Shakers provided a calm and relaxing experience for the children. The gentle shaking of the shakers and the changing colours created a soothing sensory environment, promoting relaxation and sensory stimulation.
- **Music Sessions:** The incorporation of the Glow Roller Shakers into music sessions enhanced the children's engagement and participation. The shakers added a sensory element to the music, encouraging the children to move and dance along with the rhythm.

Conclusion:

The Glow Shakers were a fantastic addition to the nursery environment, they provided a new exciting addition in music and movement play, a sensory element to calm time and brought more technology into the nursery.

With thanks to Ellie Fox from Think to the Future Tots for writing and sharing this case study with us.
