

# Glow Sequencing Cubes: Frequently Asked Questions

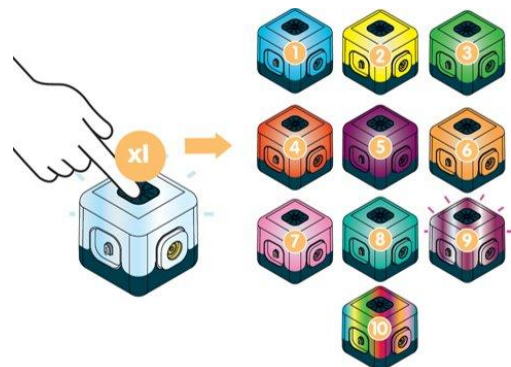

## How do I turn the Glow Sequencing Cubes on/off?

- To turn **on**, press and hold the button on top of the cube for 2 seconds.
- To turn **off**, press and hold the same button for 2 seconds.
- Each cube can be switched on or off individually.
- When an individual cube is switched on, it will glow white and the light will gently pulse to show it is active.
- **Group on/off function** - When cubes are removed from the docking station and connected together, pressing and holding the button on one cube will switch all connected cubes on or off at the same time.

## How do I change the colour on the cube?

### How many colour modes are there?

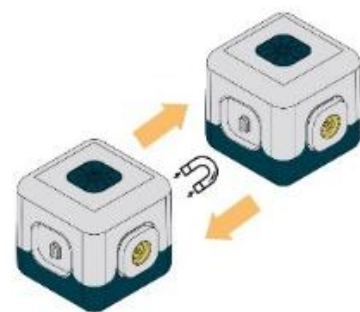

- When an individual cube is switched on, the cube will glow white and gently pulse, showing it is active.
- After this, there are **10 colour modes**. Each single press of the button moves to the next colour, as shown in the diagram. The final colour mode is one that scrolls through all the colours.

## How do the Glow Sequencing Cubes connect to each other?

### How many can be connected in one row or structure?

- The cubes connect magnetically by joining the raised and indented connections on the sides of the cubes.
- Cubes can be connected in a straight line, stacked, or arranged in different ways to create a range of structures.
- An infinite number of cubes could be connected.

## How big is each Glow Sequencing Cube and how big is the docking station?

- Cube: 58mm x 58mm x 58mm
- Docking station: 350mm x 225mm x 38mm

## Are the Glow Sequencing Cubes waterproof?

- The Glow Sequencing Cubes are **not** waterproof.

## How long do the Glow Sequencing Cubes take to charge?

### How long do they last after a full charge?

- Plug the charging cable provided into the charging port on the docking station.
- Charge time: approximately 5 hours.
- A full charge provides around 6 hours of use.
- You will know that the cubes are charging as they will glow red.
- Once fully charged, the cubes will glow green.

## Can the cubes be charged without the docking station?

- The cubes must be placed in the docking station for charging.

## I've lost the charging cable, what cable can I use?

- The docking station uses a **USB-B Cable**.
