

Reasons to **Love** TTS Lid Saver Glue Sticks 40g

We know our TTS Own Brand range is great quality, but we don't expect you to take our word for it!

Here are some reviews written by TTS customers on social media.

"The TTS lid saver glue sticks have been fantastic in my classroom; my class have been using them in the making station and have been really good at remembering to put the lids on as they are a unique shape. The glue sticks are long lasting and good quality; they stick a variety of different materials when the children are junk modelling".

By Georgia Lucas, Misslucas.eyfs (on social media)

"These glue sticks are a classroom (and home!) lifesaver. The "lid saver" design really does what it promises, no more dried-out glue sticks halfway through a project. They glide on smoothly, stick well, and are perfect for little hands to use independently".

By Rebecca Selmes,eyfs_fun_missd (on social media)

“Our children have been able to use the glue sticks independently and with ease to stick their paper designs onto coloured card as part of an art project. The benefits of being non-toxic, washable and recyclable are perfect for children and fit with our company ethos and values too”.

By Lorna Butters, Arty Explorers (on social media)

“Great glue, my 3- and 5-year-old boys find it easy to use. Would definitely recommend”.

By Ann Wlod, Creative Play Everyday (on social media)

“These glue sticks are a real art room hero. The clever lid-saver design means no more dried-out glue or lost caps - a small miracle in busy primary classrooms and craft studios. They glide on smoothly, stick well to paper and card and are chunky enough for little hands to grip confidently. In craft clubs, they’re brilliant for fast-paced making sessions where children can grab, glue and go without fuss”.
